MODUL-KEG®: Modular system
up to 200 Kegs/hour***

FRAMAX

WSF-KEG

**Fully automatic solutions for returnable washing
sterilizing and filling or combined with one way keg filling**

- Combined returnable and one-way with speed up to 60 kegs/hour
- Multiple filling head line for one way kegs with speed up to 200 kegs/hour

The machine is available starting from the smallest automatic 3 head unit having a production capacity of around 40-45 kegs/hour to the 5 head unit which reaches 60 kegs/hour. Our MODUL-KEG® solution includes two or more automatic modular WSF-KEG fillers allowing to satisfy the need for higher speed production (up to 200 kegs/hour), and includes auxiliary equipment for full automation such as depalettising, external washing, conveying, automatic keg overturning, weight control, cap or seal applicator, CIP etc., custom built according to customer requirements.

Specifications:

Washing sterilizing and filling machine for kegs (20 to 50lt) suitable for Beer, Cider, Soft drinks, Wine etc.

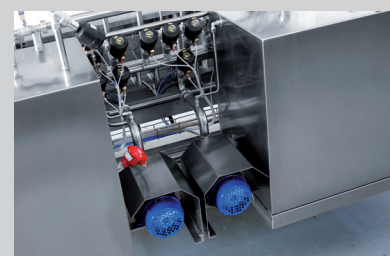

- Frame made entirely of stainless steel
- Hydraulic circuit
- Pneumatic circuit
- Electric circuit
- Tank containing alkaline detergent solution*
